1 Purpose and Scope

1.1 Purpose

This specification provides general requirements to suppliers and procurement teams as well as design teams regarding Skyworks Solutions' standard of **Banned and Restricted Substances** applicable to products, components, and materials supplied to Skyworks Solutions. This specification has been developed to fulfill the following requirements:

- To ensure suppliers, supplied materials, and Skyworks finished goods comply with legal and regulatory requirements
- To prevent specific substances from being used in Skyworks' products
- To provide Skyworks the necessary information to fully identify and declare the materials make-up of all Skyworks finished goods
- To provide guidance to suppliers regarding substances to consider for future phase-out
- To reduce adverse impacts to the environment from the materials make-up of finished goods

1.2 Scope

The scope of this document is applicable to Product, Component, and Material Suppliers whose materials are for incorporation into Skyworks products or used in packaging for shipment. This includes:

- Semi or Fully assembled parts (e.g. module, functional units, board assemblies, and other assembled parts and accessories)
- Parts (e.g. electrical parts, mechanical parts, semiconductor devices, PWB-s)
- Materials (e.g. wire, solder paste, epoxy, etc...) that are present in the Skyworks finished good
- Packaging materials (e.g. trays, reels, sticks, bags, cushions, staples, sheets, wraps, tapes, labels, corrugated cardboard, wooden frames, pallet, vinyl ties, and inks or paints for printing)

For some specific applications (e.g. aerospace, military applications), portions of this document may be exempted only by **written** approval from Skyworks.

2 Acronyms / Terminology and Description / Definition

End-of-life management	Recycling processes such as precious metals, plastic or other material recovery etc.
Green	Refer to Skyworks controlled definition in SQ04-0074 - Skyworks Definition of Green (available internally and on the Skyworks external website).
GSS Database	Green Supplier Survey Database. Provides supplier access to the Skyworks Green Procurement Supplier Specification and the on-line Green Supplier Survey.
Homogeneous material	A material that cannot be mechanically disjointed into different materials.
Intentionally added	Deliberate use in the formulation of a product or subpart where its continued presence is desired to provide a specific characteristic, appearance or quality. If listed materials or substances are contained in products or subparts purchased by supplier and are incorporated, such materials/substances must be disclosed.
Lead Free	Refer to Skyworks controlled definition in SQ04-0073 - Skyworks Definition of Pb-Free (available internally and on the Skyworks external website).
Level 1 Materials	Materials that are used in the manufacture of finished products and directly affect the form, fit or function of the finished product.

Material	A material is made up of one or more substances (e.g., copper alloy is a material, which in turn is made up of a number of defined substances, copper, nickel, silver, etc.).
Packaging	Materials used to prepare a product for shipment including Reels, bags, trays and inner and outer boxes.
ppm	parts per million, unit of measurement for weight percentage. 1 ppm = 1 mg/kg = 0.0001 % by weight. The parts per million thresholds listed in this specification refer to the weight of the material in a homogeneous material, not the weight of the material in an entire system.

4 Responsibilities

4.1 Skyworks' Responsibilities

This specification shall be provided to all applicable suppliers according to the Skyworks internal requirements as established in **SQ03-0138 - Supplier Qualification and Monitoring**. General Supplier requirements related to Environmental Programs and Green Procurement (along with standard Quality and other requirements) are communicated via the **Supplier Quality Manual (SQ02-0020)** and the **Supplier Sustainability Specification (SQ03-0337)** and are evaluated using **SQ04-0005 - Skyworks Supplier Survey and Audit Questionnaire**. Applicable Suppliers (as described in Sec. 5.2 below) are required to adhere to the materials restrictions as referenced in this document and provide Skyworks with completed materials declaration information using the Skyworks on-line **Green Supplier Survey (GSS)**. This process is detailed in **SQ03-0185 - Green Supplier Survey, Customer Survey, and DfE Process**. When required, suppliers will receive from Skyworks notice and information to complete **GSS** for specific parts.

(Note: some customers of Skyworks may have additional requirements on materials or substances not reflected in this document, that are handled on an individual basis. These requirements will be communicated to suppliers as applicable.)

4.2 Supplier Responsibilities

Though the list is intended to reflect applicable regulatory requirements, should regulatory requirements change, the MORE stringent of the two shall apply. (Note: Regulatory compliance must always be maintained.) The items and threshold values on the list are subject to change. Suppliers are required to certify in **GSS** (ref. sec. 5.7) products are free (below referenced thresholds) of all banned substances. Completed materials declarations (GSS) provided to Skyworks must include ALL substances, and may NOT be limited only to those on the Banned (or Restricted) Substances Lists or those above threshold values referenced therein.

Material declaration, reporting, and certification shall be completed using **Skyworks on-line Green Supplier Survey (GSS)**. Suppliers shall receive e-mailed instructions from Skyworks providing necessary links and log-in information to the GSS database and survey when one has been assigned. Once in the database, Suppliers have access to the **Green Procurement Supplier Specification - SQ03-0132** (this document) and the survey itself.

Green Supplier Survey

Welcome to the Green Supplier Survey (GSS) Database!

Skyworks is committed to the protection and preservation of the environment through the continuous improvement of its products and manufacturing processes worldwide. In support of this, Skyworks requires its suppliers to meet specified environmental criteria.

The GSS Database is a tool used by Skyworks to:

- 1) Communicate environmental requirements to suppliers
- 2) Provide suppliers with a means to certify conformance to Skyworks requirements including Banned and Restricted Substances.
- 3) Provide suppliers with an easy, quick, and effective means of providing full materials declarations for parts / materials supplied to Skyworks

Instructions:

1. Internet Explorer 6.x or greater is required to access this site. No other browsers are supported.
2. Disable all browser popup blockers.

I

Surveys must be completed and returned to Skyworks as indicated in the instruction e-mail and the survey form itself. Fill out all required fields at each section tab.

5.7.1 Laboratory Analysis

Upon request from Skyworks, Supplier shall provide laboratory analysis (from a third party analytical company such as SGS) to verify the information provided in the Green Supplier Survey. Skyworks will specify, at the time of request, what specific materials are to be analyzed for and any other analytical requirements. Requests for laboratory analysis will typically be made via the on-line survey form as shown below. Lab analytical files can be attached to the 'Lab Analytical' tab in the **Green Supplier Survey**. An analytical process flow chart is required for each lab analytical report.

5.8 Product Change Notice (PCN)

Any change to the material content of an approved material must be reported in written form to Skyworks Solutions. Refer to the Supplier Process Change Notice (PCN) requirements as referenced in the **Supplier Quality Manual (SQ02-0020)**. Upon approval of a supplier PCN that changes the materials content of a part or supplied material, the supplier will be issued a new **Green Supplier Survey** by the database administrator which must be completed and returned to Skyworks promptly upon receipt.
