Description

The SKY85302-11 is a complete 802.11ac WLAN RF Front-End Module (FEM) with a Bluetooth port. The device provides all the functionality of a fully matched Power Amplifier (PA), power detector, harmonic filter, Low-Noise Amplifier (LNA), and Single-Pole, Triple-Throw (SP3T) switch.

The SKY85302-11 provides a complete 2.4 GHz WLAN RF solution from the output of the transmitter to the antenna, and from the antenna to the input of the transceiver. The LNA increases the receive sensitivity of embedded solutions to improve range or to overcome the insertion loss of cellular filters (often included for mobile applications).

The SKY85302-11 also includes a transmitter power detector with 20 dB of dynamic range, and a digital enable control for transmitter power ramp on/off control.

The device is provided in an ultra-compact, 16-pin 2.5 x 2.5 mm Quad Flat No-Lead (QFN) package. A functional block diagram is shown in Figure 1.
