**PRODUCT SUMMARY**

**SKYA25000: Low-Band LNA Front-End Module (B26/B5/B18/B19, B8, B20, B12/13/17, B28A, B28B, and B29)**

**Applications**
- Diversity antenna cable or PCB trace loss compensation
- 3G/4G multimode (LTE, UMTS, CDMA2000, EDGE, and GSM)
- Embedded data cards
- Telematics boxes for automotive applications

**Features**
- Rx diversity FEM with seven selectable filters and LNA paths, two low-band LNA input ports for extended band support
- Low insertion loss
- High-performance TC-SAW filter technology
- High-performance variable gain LNAs
- SAW filters:
  - B29 (717 to 728 MHz)
  - B12/13/B17 (729 to 756 MHz)
  - B28A (758 to 788 MHz)
  - B28B (773 to 803 MHz)
  - B20 (791 to 821 MHz)
  - B26/B5/B18/B19 (859 to 894 MHz)
  - B8 (925 to 960 MHz)
- Integrated MIPI interface
- Small (4.0 × 3.0 × 0.7 mm [max]) 24-lead MCM package (MSL3, 260 °C per JEDEC J-STD-020)

**Description**
The SKYA25000 is an LNA diversity module used in cellular mobile devices. The module is typically placed close to the cellular diversity receiver antenna to enable improved system signal-to-noise ratio (SNR), improved user equipment (UE) sensitivity, and higher data throughput rates.

It is compatible with 3GPP GSM, WCDMA, and LTE standards and supports the following cellular bands: B26/B5/B18/B19, B8, B20, B12/13/B17, B28A, B28B, and B29.

The SKYA25000 is packaged in a small 4.0 × 3.0 × 0.7 mm (max), 24-lead surface-mount package. No external DC blocking capacitors are required on the RF paths as long as no DC voltage is applied. The part can operate over the temperature range of -40 °C to +95 °C ambient.

A functional block diagram is shown in Figure 1.
