

SKYWORKS®

**Billions of Connections,
One Solution**

Who We Are

We are an innovator of high performance analog semiconductors.

Our solutions are empowering the wireless networking revolution, connecting people, places and things spanning a number of new and previously unimagined applications within the automotive, broadband, connected home, industrial, infrastructure, internet of things, medical, military, mobile and wearable markets. We possess broad technology capabilities and one of the most extensive product portfolios in the industry. Our customers are global industry leaders who are delivering innovative communication platforms that are transforming the way we live, work, play and educate.

“Skyworks is at the forefront of increasing global wireless ubiquity across a wide-ranging set of applications and end-markets. Our solutions are powering some of the world’s most innovative devices—facilitating secure, high-speed, seamless connections.”

-Liam K. Griffin
President and Chief Executive Officer

Connecting Everyone and Everything, All the Time

Enabling Revolutionary 5G Applications

What We Offer

Systems Engineering Expertise

As always on connectivity plays an increasing role in our daily lives – at home, in the office, or on the go – there is a commensurate level of analog and mixed signal complexity that comes along with it. Solutions must preserve battery life, increase data rates, and ensure that connectivity technologies work seamlessly, all while occupying minimal space. Beyond world class systems expertise, meeting these design challenges requires the ability to address signal transmission and conditioning, filtering, tuning, power management, voltage regulation and battery charging challenges.

We innovate and create highly configurable and customizable solutions that reduce complexity, deliver unparalleled levels of integration and superior analog performance.

Proprietary Integration Techniques

To address growing demand for devices that deliver increased functionality and higher data rates, Skyworks is pushing the integration envelope, leveraging our systems engineering expertise, advanced manufacturing technologies and core packaging competencies to become the industry leader in high performance wireless solutions.

Valuable Intellectual Property

Patents are the core of innovation and intellectual property in the semiconductor industry. Our industry leadership position is underpinned by a library of intellectual property containing over 3,000 global patents.

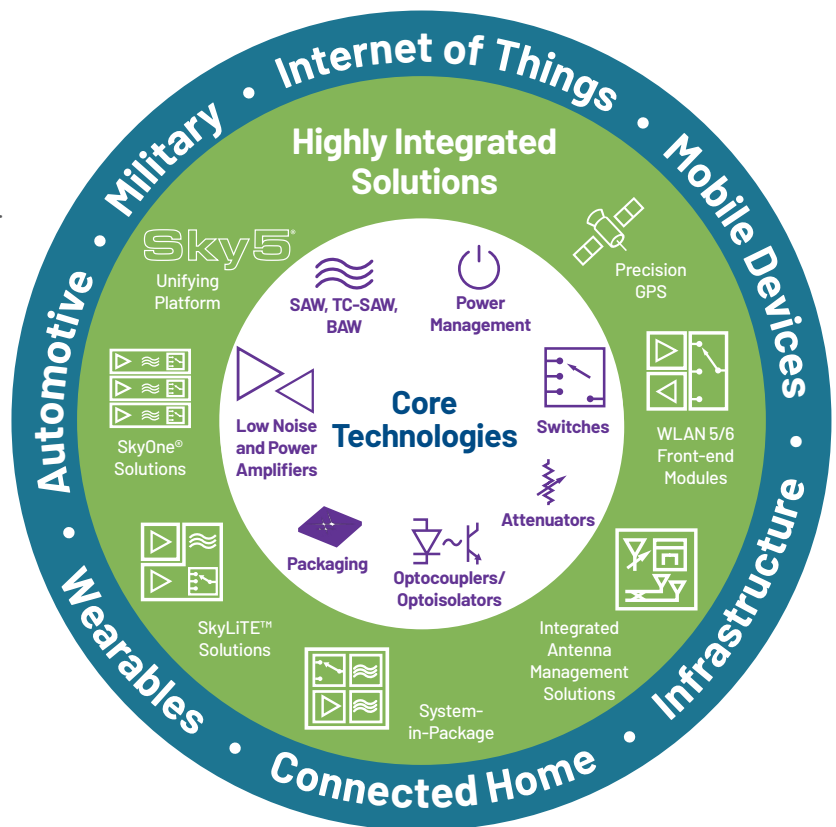

Broad Product Portfolio and Process Technology Experience

Skyworks possesses extensive experience with multiple process technologies including GaAs HBT, pHEMT, BiCMOS, SiGe, CMOS, SOI, BAW and TC-SAW – incorporated across our expansive product portfolio.

Breakthrough Solutions for 5G

With decades of experience in developing innovative solutions over successive technology generations, Skyworks is leveraging our deep systems knowledge, strategic partnerships and formidable investments to accelerate the deployment of 5G.

Sky5® is Skyworks' unifying platform powering revolutionary 5G applications. Our unprecedented suite of highly flexible and customizable system solutions provide breakthrough performance, footprint and power efficiency. These advanced wireless engines, which include highly integrated, high performance transmit/receive front-end solutions as well as diversity receive (DRx) modules, are designed specifically for new spectrum in the sub-6 GHz range. In addition, they are baseband agnostic and compliant with 3GPP standards, offering customers performance, ease of implementation and time to market advantages.

Sky5®

Unifying Platform Enabling 5G Applications

Why Skyworks?

Our Commitment to Customer Satisfaction

In today's highly competitive marketplace, we recognize quality is a differentiator and customer satisfaction is essential to our success. At Skyworks, we are committed to implementing and maintaining quality systems across the entire company, from the product development cycle to manufacturing operations and post-sales services. This fundamental commitment translates into significant, sustainable value for your business.

Our Global Scale

Skyworks has engineering, manufacturing, sales and service facilities throughout Asia, Europe and North America. We employ a global workforce of application and systems engineers who leverage our deep understanding of platform level requirements to deliver best-in-class solutions, enabling customers to focus on market demands and industrial design while we provide complete system solutions.

Our World Class Operations

Skyworks' state-of-the-art manufacturing facilities employ multiple technologies and operate at the highest standards to deliver more than five billion units per year to our customers – either as individual components, modules or highly integrated solutions. Skyworks vertically integrates where we can create a competitive advantage, or enters into alliances and strategic relationships for leading-edge capabilities. This hybrid approach allows us to better balance our manufacturing capacity with the demands of the marketplace, while our internal capacity utilization remains high. Further, our scale advantages coupled with our ability to remain agile and flexible contribute to our success in achieving the industry's shortest cycle times, highest yields, and ultimately, the lowest cost structure.

As always, all of our solutions are backed by world-class customer service and proven technology.

Certifications

As an industry leader, Skyworks goes above and beyond traditional standards and customer requirements. We adopt a holistic approach to quality systems and have strengthened our commitment to customer satisfaction. Meanwhile, our quality leadership has led to formal, third-party registration to AS9100D, ISO 9001, ISO/TS 16949, ISO 14001 and ANSI/ESD S.20.20.

Our Technology Leadership

Skyworks is proud to be a member and active participant of several standards organizations that are playing a critical role in ensuring interoperability among systems and networks, compliance with legislation, security, and other needs of the industry.

Our Culture

At Skyworks, we realize that in order to exceed our customers' expectations, we must maintain and foster a work environment where our employees feel empowered and motivated. Our culture is based on minimal layers of management, ease of collaboration, open communication and an entrepreneurial attitude of taking well-calculated risks. The result is fast decision-making and innovation.

Recognition / Awards

- **Forbes:** America's Top Public Companies
- **Fortune:** 100 Fastest Growing Companies
- **Federal Government of Mexico:** 2015 National Export Award (PNE)
- **Boston Globe:** Top Work Place
- **Motley Fool:** 25 Best Companies in America
- **Orange County Register:** Top Work Place
- **Great Place to Work Institute:** 2016 Certified (Mexico)

Diversity and Inclusion

Skyworks supports diversity in the workplace and is proud that our employees represent 61 nationalities worldwide. We strive to create an environment where everyone feels welcomed, valued and respected.

Skyworks is an Equal Opportunity Employer. Employment decisions are made without regard to race, color, religion, national origin, gender, sexual orientation, gender identity, age, physical or mental disability, genetic factors, military/veteran status or other characteristics protected by law.

Sustainability

Sustainability matters. The actions we take and choices we make today affect our future. For this very reason, Skyworks is committed to operating under sustainable business practices. We continuously aim to make our products better – from design and development, to manufacturing, performance, and end-of-life. For example, efficiency in design ensures our solutions are developed to minimize power consumption and increase battery life. Efficiency in manufacturing ensures we employ minimal materials and natural resources.

Corporate Citizenship

Guided by our Quality and Sustainability policies, our goal is to make great products, responsibly. This is at the heart of operating a sustainable business – to add value for all stakeholders. Our systems are designed and operated in accordance with the Responsible Business Alliance (RBA®) Code of Conduct. The RBA® is a nonprofit coalition of electronics companies committed to supporting the rights and well-being of workers and communities worldwide affected by the global electronics supply chain. RBA® members commit, and are held accountable to, a common Code of Conduct and utilize a range of RBA® training and assessment tools to support continuous improvement in the social, environmental and ethical responsibility of their supply chains.
