

DATA SHEET

SKY13392-359LF: 0.02 to 4.0 GHz High Isolation SP4T Absorptive Switch with Decoder

Applications

- GSM/CDMA/WCDMA/LTE cellular infrastructure
- Test and measurement systems
- Military communications

Features

- Broadband frequency range: 0.02 GHz to 4.0 GHz
- Low insertion loss: 1.0 dB @ 2 GHz
- Typical isolation: 54 dB @ 2 GHz
- Positive voltage control: 0/3 V to 0/5 V
- Isolated ports are absorptive from 500 MHz to 4 GHz
- Small, QFN (16-pin, 4 x 4 mm) package (MSL1, 260 °C per JEDEC J-STD-020)

Skyworks Green™ products are compliant with all applicable legislation and are halogen-free. For additional information, refer to *Skyworks Definition of Green™*, document number SQ04-0074.

Description

The SKY13392-359LF is a symmetrical, single-pole, four-throw (SP4T) switch. The switch is intended for GSM/CDMA/WCDMA/LTE cellular infrastructure applications. The impedance of the RF ports in isolation is 50 Ω at frequencies above 500 MHz.

The SKY13392-359LF is manufactured using Skyworks state-of-the-art GaAs pHEMT process. The SKY13392-359LF features integrated logic that uses only two control lines for switch operation.

The SKY13392-359LF SP4T switch is provided in a compact Quad Flat No-Lead (QFN) 4 x 4 mm package. A functional block diagram is shown in Figure 1. The pin configuration and package are shown in Figure 2. Signal pin assignments and functional pin descriptions are provided in Table 1.

Table 2. SKY13392-359LF Absolute Maximum Ratings

| Parameter | Symbol | Minimum | Maximum | Units |
|----------------------------|-------------------|---------|-----------------|-------|
| Supply voltage | V _{DD} | | 5.5 | V |
| Input power | P _{IN} | | +32 | dBm |
| Control voltage (VC1, VC2) | V _{CTRL} | | V _{DD} | V |
| Operating temperature | T _{OP} | -40 | +85 | °C |
| Storage temperature | T _{STG} | -40 | +125 | °C |

Note: Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

CAUTION: Although this device is designed to be as robust as possible, Electrostatic Discharge (ESD) can damage this device. This device must be protected at all times from ESD. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD precautions should be used at all times.

Functional Description

The SKY13392-359LF is comprised of a CMOS decoder that enables two TTL-compatible DC lines to control four RF ports. The decoder is internally connected to a GaAs pHEMT RF switch. Depending on the logic voltage level applied to the control pins, the RFC pin is connected to one of four switched RF outputs (RF1, RF2, RF3, or RF4) by a low insertion loss path, while maintaining a high isolation path to the alternate port.

The CMOS decoder should have V_{DD} applied before a logic high is applied to one of the control lines.

The recommended startup sequence is:

Step 1: Apply V_{DD}.

Step 2: Apply VC1 and VC2

Step 3: Apply RF input.

The device must be turned off in the reverse order.

Electrical and Mechanical Specifications

The absolute maximum ratings of the SKY13392-359LF are provided in Table 2. Electrical specifications are provided in Table 3.

The state of the SKY13392-359LF is determined by the logic provided in Table 4.

Typical performance characteristics of the SKY13392-359LF are illustrated in Figures 3 through 9.

Evaluation Board Description

The SKY13392-359LF Evaluation Board is used to test the performance of the SKY13392-359LF SP4T Switch. An Evaluation Board schematic diagram is provided in Figure 10. An assembly drawing for the Evaluation Board is shown in Figure 11.

Package Dimensions

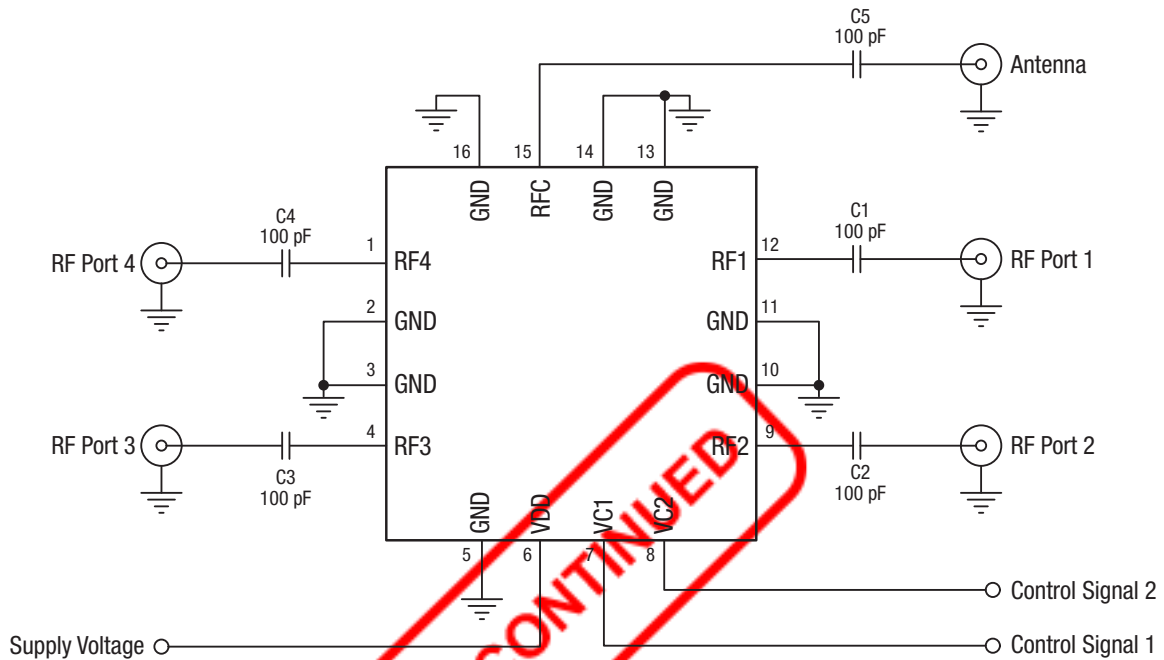

The PCB layout footprint for the SKY13392-359LF is provided in Figure 12. Typical case markings are shown in Figure 13. Package dimensions for the 16-pin QFN are shown in Figure 14, and tape and reel dimensions are provided in Figure 15.

Package and Handling Information

Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly.

THE SKY13392-359LF is rated to Moisture Sensitivity Level 1 (MSL1) at 260 °C. It can be used for lead or lead-free soldering. For additional information, refer to the Skyworks Application Note, *Solder Reflow Information*, document number 200164.

Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. Production quantities of this product are shipped in a standard tape and reel format.

Note: To operate at <500 MHz, the values of all capacitors must be increased to maintain return loss in the insertion loss state. The return loss in an isolation state degrades at low frequencies due to limitations of on-chip capacitors.
