PRODUCT SUMMARY

SKY65725-11: Shielded Low-Noise Amplifier Front-End Module with GPS / GNSS / BDS Pre-Filter

Applications

- GPS/GNSS/BDS radio receivers
- Global Navigation Satellite Systems (GLONASS)
- Fitness/activity trackers
- Smartphones
- Laptop PCs and tablets

Features

- Innovative proprietary shielded technology
- Wideband pre-filter
- Small signal gain: 16.5 dB typical
- Excellent out-of-band rejection
- Low noise figure: 1.8 dB typical
- Low current consumption
- Input/output impedance internally matched to 50 Ω
- Single DC supply: 1.1 to 2.85 V
- Minimal number of external components required
- Small MCM (9-pin, 1.6 x 1.6 x 0.75 [nominal] mm) package (MSL3, 260 °C per JEDEC J-STD-020)

Skyworks Green™ products are compliant with all applicable legislation and are halogen-free.

For additional information, refer to Skyworks Definition of Green™, document number S004-0074.

Description

The SKY65725-11 is a shielded front-end module (FEM) with an integrated low noise amplifier (LNA) and pre-filter designed for Global Positioning System / Global Navigation Satellite System / Beidou Navigation Satellite System (GPS / GNSS / BDS) receiver applications. The device provides high linearity, excellent gain, a high 1 dB input compression point (IP1dB), and a superior noise figure (NF).

The pre-filter provides the low in-band insertion loss and excellent rejections of the cellular, PCS, and WLAN frequency bands. The SKY65725-11 uses surface-mount technology (SMT) in a Multi-Chip Module (MCM) package, which allows for a highly manufacturable and low-cost solution.

An additional filter is incorporated in the SKY65725-11 to improve performance in the presence of a Band 13 blocker.

A functional block diagram is shown in Figure 1.
