

Verification Opinion Skyworks Solutions, Inc. FY2025 GHG Inventory

Background

Cameron-Cole, LLC (Cameron-Cole) was retained by Skyworks Solutions, Inc. (Skyworks) to perform an independent verification of its Greenhouse Gas (GHG) Emissions Inventory (GHG Statement) for Fiscal Year (FY) 2025. The Scope 1 and 2 GHG Inventory was developed according to the World Resources Institute (WRI)/World Business Council for Sustainable Development (WBCSD) Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (2004 revised edition) along with its associated amendments. The Scope 3 GHG Inventory was prepared using the WRI/WBCSD Corporate Value Chain (Scope 3) Accounting and Reporting Standard dated September 2011 and associated amendments. Our opinion on the results of the inventory, with respect to the verification objectives and criteria, is provided in this statement.

Responsibility of Skyworks & Independence of Verification Provider

Skyworks has sole responsibility for the content of its GHG Statement. Cameron-Cole accepts no responsibility for any changes that may have occurred to the GHG emissions results since they were submitted to us for review. Based on internationally accepted norms for impartiality, we believe our review represents an independent assessment of Skyworks' FY2025 GHG Emissions Inventory. Finally, the opinion expressed in this verification statement should not be relied upon as the basis for any financial or investment decisions.

Level of Assurance

The level of assurance is used to determine the depth of detail that a Verification Body designs into the Verification Plan to determine if there are material errors, omissions, or misstatements in a company's GHG assertions. Two levels of assurance are generally recognized—reasonable and limited. Reasonable Assurance generates the highest level of confidence that an emissions report is materially correct (with the exception of Absolute Assurance which is generally impractical for companies to achieve). Limited Assurance provides less confidence and involves a less-detailed examination of GHG data and supporting documentation. Limited Assurance statements assert that there is no evidence that an emissions report is not materially correct. Cameron-Cole's verification of Skyworks' GHG Emissions or Inventory for FY2025 was constructed to provide a Limited Level of Assurance.

Objectives

The primary objectives of this verification assignment were as follows:

- Determine whether the FY 2025 GHG emissions assertions meet/exceed the 95% threshold for accuracy for Scope 1, 2, and 3 emissions (assessed separately);
- Evaluate the conformance of Skyworks accounting and calculation methodologies, processes, and systems to the WRI/WBCSD GHG Protocol and WRI/WBCSD Corporate Value Chain (Scope 3) Accounting and Reporting Standard.

Verification Criteria

Cameron-Cole conducted verification activities in alignment with the principles of ISO-14064-3:2019(E) Specification with guidance for the verification and validation of greenhouse gas statements. The Skyworks' GHG statement was prepared to, and verified against, the WRI/WBCSD GHG Protocol and WRI/WBCSD Corporate Value Chain (Scope 3) Accounting and Reporting Standard.

Verification Scope & GHG Statement

The scope of the verification covers Skyworks' FY2025 GHG Emissions Inventory with the following boundaries:

- **Geographical:** Worldwide
- **Chemical:** carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFCs), perfluorochemicals (PFCs), sulfur hexafluoride (SF₆), and nitrogen trifluoride (NF₃)
- **Organizational Boundary:** Six manufacturing facilities and approximately 31 non-factory office buildings and laboratories.
- **Operational Boundary:** The following sources/emissions were identified in Skyworks' organizational boundary:
 - Scope 1
 - Direct emissions from stationary combustion sources: natural gas
 - Direct process emissions
 - Scope 2
 - Indirect emissions from purchased electricity
 - Scope 3

- Category 1: Purchased Goods and Services
- Category 2: Capital Goods
- Category 3: Fuel- and Energy-related Activities (not included in Scope 1 or 2)
- Category 4: Upstream Transportation and Distribution
- Category 5: Waste Generated in Operations
- Category 6: Business Travel
- Category 7: Employee Commuting
- Category 8: Upstream Leased Assets
- Category 9: Downstream transportation and distribution
- Category 10: Processing of sold products
- Category 11: Use of sold products
- Category 12: End of life treatment of sold products

In addition to GHG emissions, Cameron-Cole verified Skyworks’ water withdrawals and percentage of water recycled at the six manufacturing facilities.

Skyworks’ FY2025 GHG and Water assertions are as follows:

GHG Emissions Category	Factory (MT CO ₂ e)	Non-Factory (MT CO ₂ e)
Total Scope 1 Emissions:	34,483	65
Total Location-Based Scope 2 Emissions:	141,578	8,029
Total Market-Based Scope 2 Emissions:	17,923	7,610
Total Scope 3 Emissions:		1,382,837
Total Location-Based Emissions:	1,558,898	1,390,931
Total Market-Based Emissions:	1,435,243	1,390,512

Water	Gallons
Water Withdrawal:	419,851,002
Water Recycling Rate:	53%

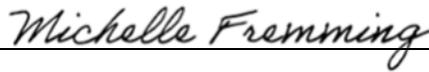

Verification Opinion

Based on the method employed and the results of our verification activities, Cameron-Cole has found no evidence of material errors, omissions, or misstatements in Skyworks’ FY2025 GHG Statement. Cameron-Cole also found that Skyworks’ GHG accounting and calculation methodologies, processes, and systems for this

inventory conform to the WRI/WBCSD GHG Protocol and WRI/WBCSD Corporate Value Chain (Scope 3) Accounting and Reporting Standard.
